Induction WOK "PROFI" with top

**Multifunctional
use**

Der Bohner

Model

High-performance Induction WOK "PROFI" with top

	Position	External dimensions B x D	Glass area B x D	Power consumption	Type	Height
BI 10		400 x 400 mm	392 x 392 mm	5,0 kW/400 V	A = Table-top appliance	
Height without top:		200,0 mm				
Height with top:		236,5 mm				

The Indux wok table-top appliance is designed in such a way that it can be used without problems as an **E = installed appliance** for easy – exclusively protruding – installation (due to inclusion of a WOK top).

A further installation version is provided by **K = installation-KIT**. This loose installation set, comprising 1 induction coil, 1 induction trough, 1 induction generator in 1 generatorbox, operating elements and optional air channel extensions enables flexible installation.

BOHNER Induction WOK – a multi-talent for each kitchen set-up

What would you like to prepare in it?

- Saving of energy up to 80 % depending on the field of application.
- Current consumption only if the cooking utensils are in use thanks to recognition system.
- About 40 % more output in à-la-carte operation.
- Energy available immediately, infinitely adjustable without pre-heating time.
- Minimum preparation time, thus optimum degree of efficiency.
- Pleasant room and working climate as the Induction WOK doesn't radiate any heat.
- Minimum cleaning requirements, no scorching of residues of meals or food containing sugar.
- Exhaust air systems can be dimensioned smaller and cheaper.

BI 10 WOK A

Multifunctional system:

- ◆ In a matter of seconds, this Induction WOK can be converted into a flat high-performance cooking position for saucepans, sauté pans, casseroles and pans with a handle and can thus be used in a versatile way.
- ◆ Lowest possible EMC radiation thanks to specific construction secured by protective rights.

Induction generators have been tested all over Europe.
